

'Global Food Security through Agricultural Transformation'

NAPA 2020: 2nd Biennial International Scientific Conference

September 25-28

Online/Virtual

Agricultural transformation is one of the keys to reduce hunger worldwide. **NAPA 2020** focuses on securing food, feed, fuel, and fiber (F4) for the ever increasing population through advanced agricultural innovations, best management practices, and environmentally friendly sustainable agricultural production systems with equitable distribution in a world of widening inequalities, increased climate variability, dynamic land-use, and volatile agricultural markets.

Scope: From graduate students to professionals of agriculture and allied disciplines, **NAPA 2020** conference will be a premier venue for sharing global experiences about research, education and networking opportunities.

Conference Highlights

- ◆ Professional scientific oral and poster presentations
- ◆ Panel discussions (Gender, Food Security, Agri-Policy)
- ◆ Plenary session with invited speakers
- ◆ Professional collaboration and networking
- ◆ Recognition and Award ceremony
- ◆ Competitive student oral and poster presentations
- ◆ Rapid-fire scientific presentations competition
- ◆ Student essay writing contest
- ◆ Competitive agri-poems recitation
- ◆ Social/cultural hours
